Recruit participants

Filtering

How do you want to filter participants?

- ☐ Use a saved filter set
- ☒ Choose filters
Find the right participants for your study using 300+ filters. Build the exact query you want with the query tree. Can't find the filter you're looking for? Use [Custom screening](#) in your study.

Study distribution and audience selection

How do you want to distribute your sample?

Standard sample

Distribute your study to available participants.

Quota sample

Distribute your study using custom quotas.

Representative sample

Distribute your study based on UK or USA census data.

49,185

matching participants who have been active in the past 90 days.

29,241 active last week

AND

First Language is any of English

Approval Rate is between 95-100

Number of previous submissions is between 100-100000

Current Country of Residence is any of United States

Language related disorders is any of none

Exclude participants from other studies is any of application pilot v1, application pilot v1 (features), application pilot v2, application pilot v3, application pilot v4, application pilot v4.1, application pilot v5, application pilot v6, application pilot v6.1

+ Add filters + Add a sub-condition

Clear all

Start by adding filters using "Add filters". Use a sub-condition for combinations like X AND (Y OR Z).

Submissions

Total times a participant can complete your study

- ☒ Once
- ☐ Multiple
Allow participants to complete your study multiple times.

Reject exceptionally fast submissions Beta

Prolific can automatically reject exceptionally fast submissions that fall significantly below your estimated completion time to prevent low quality submissions.

Automatically reject exceptionally fast submissions?
